

## TITA-K & TITA-K70

Titanium dioxide-based additives  
(TiO<sub>2</sub>)

Raw materials for Clay brick industry

KIMPE offers TITA-K (powder form) and TITA-K70 (liquid suspension), titanium dioxide-based solutions designed for the clay brick and roofing tile industry. They enable the development of shades ranging from pale to intense yellow.

### Applications

- ✓ *Clay bricks with pale to intense yellow coloration*
- ✓ *Clay roofing tiles requiring stable yellow shades*
- ✓ *Clay flower pots, floor tiles and pavers*

#### POWDER FORM

Finely milled titanium dioxide powder for precise dosing and stable yellow coloration in bricks and tiles.

#### SLURRY FORM

Liquid suspension (70% solids) ready for direct dosing. Dust-free, easy to handle, and ideal for automated production.

#### TECHNICAL SUPPORT

Our experts provide tailored assistance, in-plant trials, and full analytical documentation (TDS, SDS, chemical and granulometric analysis).
